WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

~~TOP SECRET RUFF~~

TCS-80352/67

September 1967

This is the first issuance of material for Section II (Airfields) of the Middle East Activity Report and includes subsection II B (Egyptian Airfields). Other parts of Section II are being prepared for inclusion under this cover and will be issued soon. Section I (Naval Installations) was issued under the same control number in June 1967.

~~TOP SECRET RUFF~~

INTRODUCTION

Section II, Airfields, of the Middle East Activity Report, is a summary of photographic information on selected Middle East airfields. The purpose of Section II is to present a systematic treatment of the general appearance, location, and capabilities of these airfields.

All primary and secondary airfields are included as well as some of the smaller airfields which may have military potential. Such components and associated features and facilities as runways, taxiways, parking aprons, hardstands, firing-in butts, support facilities (housing, administration, maintenance, POL storage, and ammunition storage), electronics facilities, defense features, missile storage, and missile support facilities are considered for each installation. However, only the features that can be identified on overhead photography are discussed. Features that are not mentioned may be assumed to be either absent or not discernible on photography. Airfields in Egypt, Jordan, and Syria that are presently occupied by Israel will be reported within the country boundaries as they existed in May 1967.

Section II will be periodically updated and additional installations will be added to the list if significant changes occur or better photography permits more detailed analysis.
